

15. September 2022

At the Dresden University of Applied Sciences, the second largest university in the Saxon state capital, application-oriented teaching and practice-oriented research are combined.

"Achieving more in practice" characterizes the course of study at the Faculty of Spatial Information for approx. 360 students in the fields of geomatics, cartography and surveying.

The Faculty of Spatial Information seeks to fill the position of a

Teaching staff member as visiting scholar (f/m/d) – 30/2022

in the field of **Cartography and modern teaching** by summer semester of 2023. The position is available as a fulltime job for one year.

An onboarding and mentoring program supports you in becoming pedagogically qualified as a prerequisite for a regular professorship at universities of applied sciences. The visiting scholar will be given the opportunity to participate in university didactic and postdoctoral qualification programs.

The fields of appointment include the topics

- Didactics of Cartography
- Digital Map Design and Geo visualization
- Geographic Information Systems (GIS)

Your tasks and priorities

The guest professorship is intended to provide didactic and content-related impulses for the reorientation of the courses offered by the Faculty of Spatial Information. The quality improvement focuses on the areas of internationalization, introduction of modern teaching contents of cartography and guidelines of a teaching concept for the didactics of cartography. Collaboration in current research projects of the faculty is desired.

Your profile:

The applicant must have a relevant scientific university degree, successfully completed PhD, expertise in the above-mentioned areas, didactic skills to impart knowledge, as well as the willingness and ability to conduct courses in English (international teaching experience), relevant professional experience is desirable.

The remuneration is based on the grouping of scientific employees according to the collective agreement for employees in the public service of the federal states (TV-L).

For further information, please contact

Prof. Dr. Stephan Kopf
Dean of the Faculty of Spatial Information
Phone: +49 (0)351 462-3130
E-Mail: stephan.kopf@htw-dresden.de

Application:

Please submit your application, indicating the Chiffre alongside relevant documents (curriculum vitae in tabular form, description of the scientific / professional development path, lists of publications and courses, copies of certificates of all academic degrees achieved) by **October 23th, 2022**

by e-mail to: bewerbung@htw-dresden.de

or by mail to:
Hochschule für Technik und Wirtschaft Dresden
Dezernat Personalangelegenheiten
Friedrich-List-Platz 1, 01069 Dresden, Germany
